

PROJETOS de INJEÇÃO PLÁSTICOS Unipessoal LDA

"PROFICIENT AND COMPETENT INJECTION MOULDING PROJECT MANAGEMENT"

Based in Portugal, PIP - PROJETOS de INJEÇÃO PLÁSTICOS, Unipessoal LDA, has been expanding its engineering services since its establishment in 2011. The business once started in the UK and then moved to Portugal in 2016 enabling closer and faster support to its customers.

The company has the mission of providing the greatest contribution to the success in the development of injection moulding projects for parts of high standards to its national and international customers.

"PIP-UNIP-LDA" project manages, assists with design and manufacture methods and takes on responsibility from start to finish.

It also offers an integrated service in the production of moulds, ensuring a quick response and competitive prices, always taking into account the satisfaction of their customers.

Within each project, we are working with the maximum commitment and confidentiality to achieve the best results for the product, product engineering (design), tool design, production process and means of control.

While working in continuously technologically advancing times we are always seeking to stay within budget providing maximum value for our customers and their needs.

The members of the team speak PORTUGUESE, GERMAN, ENGLISH & SPANISH.
